

Concerned about
your cholesterol?

Don't give up on beef!

Over 10 years of research shows
you can enjoy beef and manage your cholesterol.

Lean beef is delicious and packed
with hunger-curbing protein.

**A smarter way
to cut fat**

Eat less fast foods and
sweet baked goods.
They are high in fat
and make up almost
50% of our daily
calorie intake.¹

Take a **Fresh** Look at Beef

In the largest worldwide review of red meat and heart disease **ever completed**, researchers at Harvard found that eating up to 100g of unprocessed red meat (beef, pork, lamb) per day is **not associated** with higher risk of heart disease.²

The European Prospective Investigation into Cancer and Nutrition (EPIC) - a large study that followed close to half a million people for more than 12 years - found **no association** between eating red meat and any cause of death, including cancer or heart disease.³

Beef's surprising fat profile

Half of the fat in beef is monounsaturated, the same type of healthy fat found in olive oil.

Research supports including beef in a healthy diet.
